

Watch television, listen to the radio, surf the web or send a photo from your cell phone and, somewhere, at some point, you will touch a media network designed and engineered by Communications Engineering, Inc.

If you're looking for an exciting career with a stable and growing high tech company and are ready to apply your skills to the most challenging technical and programmatic issues of today's exploding broadcast, audio-visual and multi-media landscape, then we want to hear from you!

Communications Engineering, Inc. (CEI)

Headquartered just south of Washington, D.C. in Newington, VA, Communications Engineering Inc. (CEI) is an award-winning, consulting, design and systems integration company focused on the television broadcast, audio-visual and multi-media industries. CEI offers complete equipment service, support and training, and supplies products and services to a wide range of large, medium and small commercial clients as well as non-profit and government agencies. We are an energetic, highly motivated team, focused on the success of our customer's projects and the continued growth of our company.

Installation Supervisor

JOB DESCRIPTION

The Installation Supervisor is responsible for the installation of Audio-Visual, Broadcast and Multi-Media systems to CEI standards. The supervisory requirements include execution of the installation project schedule, report progress, delegation of work assignments; provide technical assistance to staff, collaboration with client, integration and project managers. This is a hands-on supervisory position working with crews sized appropriate to the job. Labor efforts will include but not limited to: development of cable fabrication databases, mounting equipment, cutting, terminating and identifying various types of audio, video and data cables. The installation of cables in equipment racks, closets and cable management systems is also required.

Essential Functions:

- Leading a team of wiremen and installers to integrate CEI systems as designed.
- Train and mentor installation staff
- Monitor quality and adherence to standards (project QC).
- Organization of the work, and the timely completion of the work according to the project scope, schedule and budget.
- Assist in the development of manpower estimates, work assignments and project time lines.

JOB REQUIREMENTS

Basic Qualifications:

- 5 or more years of experience in electronic media systems installation.
- Ability to read and interpret basic schematic drawings and cable run lists.
- Ability to read and understand architectural construction drawings and related documentation.
- Familiarity with Microsoft Office programs, Excel, Word.
- Familiarity with Database programs and MS Project.
- Strong interpersonal skills, excellent oral and written communication skills.
- Must be able to manage strict timelines and multiple installation teams in order to meet deadlines.
- Proven leadership skills and effective team builder.
- Ability to interact with field personnel, management and customers.
- Should be able to climb ladders, lift up to 50lbs. and be able to operate the necessary hand tools and vehicles as required.
- Must qualify to work in the US without sponsorship.

Preferred Qualifications:

- Professional certifications (CTS, CTS-D, CEDIA) are a plus.
- Familiarity with Broadcast and/or Audio Visual Systems Integration.
- A.S. in Electronic Technologies or a related field. Equivalent experience and/or military training.

Travel Requirements:

- Travel is required
